

## Manufacturing Industry

# Transform and build your applications for Industry 4.0

Manufacturing business that plan to evolve for Industry 4.0 must be more agile, innovate faster and remain in-sync with fast changing customer expectations. We empower manufacturing companies to manage their businesses in real-time and provide up-to-date business insights. We provide clear visibility into supply chain operations, inventory levels, order and fulfillment status. We work with the existing ERP, CRM systems and build integrated solutions to improve efficiency, enhance service capability and reduce operating costs.

## Build a more customer-centric supply chain

“ We've been working with Trigent ever since 2001, building, maintaining, and improving the bill of materials system. Trigent rewrote the existing program and developed an algorithm and custom inventory system and over the years continues to provide, unsurpassed quality and support.

— Tom Gidley, Process Information Officer, Navistar

## Streamline your supply chain by overcoming these challenges
